

SMART Tips and Tricks and Tools

Moving objects without changing their appearance:

1. Use the drop-down menu on an object in the work area of SMART Notebook and choose *Locking*.

2. Expand *Locking*, then click *Allow Move*.

3. The object can be moved but not edited.

Did you know?

4. *Locking, Allow Move* on an animated object removes the marquis box around the object when clicked. (for example, animate the object to fade out, then *Locking, Allow to Move*)
