

Royal® Interactive Teaching Center for SMART LightRaise 60Wi

(Yes, the name is a bit of a mouthful!)

A flexible, multi-functional teaching center for K-3 classrooms.

Featuring a 16:10 Widescreen with finger and pen touch capabilities, the system is designed to support both traditional and tech learning approaches. The porcelain enamel board is highly durable and has a scratch resistant surface. The board is also angled and sits at a low level making it particularly user friendly for young students and those with special needs.

Teachers' can also take advantage of the Center's mobility* by setting it up anywhere they like in the classroom. Having a SMART Board permanently mounted on the wall can often result in less flexible teaching environments and underutilizes technology investments. It has also been engineered to minimize screen shaking and avoid the need for projector calibration.

*Please note: Designed to be mobile **within** a classroom environment only and not moved from class to class.

Key features:
