

SMART Notebook® Advantage software maintenance plan

A SMART Notebook Advantage subscription ensures your teachers always have access to the latest innovations in SMART Notebook software. Your subscription equips you with additional tools to make lessons more dynamic and engaging as we continue to invest in new features and functionality for SMART Notebook software.

SMART Notebook 2014 and 14.2, the latest versions of SMART Notebook software, provide a number of key enhancements and subject-specific add-ons which enable teachers to inspire learning every day.

Ensure everyone gets the most out of SMART Notebook software with SMART Notebook Advantage.

Inspired Collaboration™ | SMART®

Unlock the full potential of **SMART Notebook** collaborative learning software

This annual subscription ensures that you can upgrade to the latest version of SMART Notebook, unlock add-ons and plug-ins and access live technical support.

New features of SMART Notebook 2014 and 14.2

SMART Response VE *

Seamlessly transition between lesson delivery and assessment. Students can respond to planned and spontaneous questions and quizzes from any Internet-enabled device, anywhere.

* only available with a valid subscription to SMART Notebook Advantage

XC basic

Stimulate collaboration and discussion while incorporating mobile devices into your SMART Notebook lessons in new and exciting ways.

SMART Notebook Math powered by Geogebra

Improve math functionality for all grade levels with more than 55,000 math content objects and interactive activities for geometry, algebra, calculus and statistics. It supports both Mac and PC.

Ink editing

Enhance instruction with automatic handwriting recognition and conversion combined with intuitive text editing capabilities. Now you can edit, move, delete, modify or insert text objects without reaching for a keyboard.

SMART Notebook Connect

Find and explore new content, resources and professional development within SMART Notebook.

SMART Notebook 3D tools

Provide truly immersive learning through the use of 3D objects right in your SMART Notebook lesson. You can also create 3D SketchUp objects for your lesson by downloading SketchUp files from the Trimble 3D warehouse, or using SketchUp files you've created.

Math Equation Editor

Write an equation and have it instantly converted to typed text. Edit the equation by double-clicking it. When it's ready, drag it into a GeoGebra worksheet to be automatically graphed.

SMART Blocks

New to SMART Notebook 14.2, SMART Blocks provide a fun and innovative way to explore math concepts. Students write numbers and drop them into the equation block where the answer is automatically formulated. It can be tailored for simple addition and subtraction to basic algebra.

SMART Notebook Maestro add-on *

Interact with content and conduct collaborative SMART Notebook lessons with an interactive display and a single iPad anywhere in the classroom.

* Must have SMART Notebook for iPad app, SMART Notebook Advantage and SMART Notebook 14.2
